

## JMH CAP Record of Decision

### JMH CAP FACTS Overview

#### BACKGROUND:

The Jack Morrow Hills Coordinated Activity Plan (JMH CAP) covers 622,330 acres of the more than 3.6 million acres of public land surface and 3.5 million acres of public subsurface minerals managed by the BLM Rock Springs Field Office.

The JMH CAP area represents approximately 17% of the field office surface area. The JMH CAP and additional information can be found at [www.wy.blm.gov/jmhcap](http://www.wy.blm.gov/jmhcap).

#### SPECIFICS:

	<b>Acres</b>
Federal Surface - Federal Minerals with surface estate administered by BOR	1,980
Federal Surface - Federal Minerals with surface estate administered by BLM	567,080
Federal Surface - State Minerals* (surface estate administered by BLM)	7,720
Private Surface - Federal Minerals*	7,030
Private Surface - Private Minerals*	8,800
State Surface - Federal Minerals*	720
State Surface - State Minerals*	29,000
<b>Total Acreage</b>	<b>622,330</b>

- Part of these land/mineral estates are not subject to BLM decisions in the CAP but were considered in the JMH environmental analysis process.
- The decisions in the JMH CAP apply only to the BLM-administered lands and minerals.

### JMH CAP FACTS Air Quality

#### BACKGROUND:

The air quality analysis for the JMH CAP uses the air quality analysis prepared for the Pinedale Anticline Air Quality Technical Report (2000). An air quality analysis completed in 2005 for the Jonah Infill Drilling Project, supplements the original study.

#### SPECIFICS:

- The "Jonah Infill Drilling Project Draft Air Quality Technical Support Document Supplement" includes oil and gas development projections for the Jack Morrow Hills area. The analysis shows negligible contributions to air quality from activities authorized by the JMH CAP.
- The "Jonah Infill Drilling Project Draft Air Quality Technical Support Document Supplement" is available at <http://www.wy.blm.gov/nepa/pfodocs/jonah/index.htm>

## **JMH CAP Record of Decision**

### **JMH CAP FACTS Cooperating Agency Involvement**

#### **BACKGROUND:**

Cooperating agencies have been an integral part of planning and NEPA process for the JMH CAP by actively participating in work sessions, attending meetings, and commenting on document drafts. Their participation provided a forum for sharing information with other government agencies

#### **SPECIFICS:**

- The cooperating agencies for the JMH CAP were:
  - State of Wyoming
  - Sublette County
  - Fremont County
  - Sweetwater County
  - Popo Agie Conservation District
  - Sublette County Conservation District
  - Sweetwater County Conservation District

### **JMH CAP FACTS Public Involvement**

#### **BACKGROUND:**

The JMH CAP was developed with extensive public involvement and with cooperating agency input

#### **SPECIFICS:**

- More than 40 public meetings, open houses, field tours, and hearings were held
- The JMH CAP Web site, news releases, and newsletters provided information
- The JMH CAP implementation, monitoring and evaluation strategy provides opportunity for continued public involvement as implementation begins
- Continued public participation by citizens, industry, and other government agencies will help in the successful management of the JMH area
- The public is encouraged to continue its involvement in the implementation of the JMH CAP
